---

## Description

Our Volumetric Filling Line is a fully automated filler that can be configured with either Electromagnetic Flow Meters or Pistons. Often used for cosmetics, pharmaceutical, food, chemical, and home care industries. Product viscosity can range from water to thick sauces, creams, lotions, liquids with solids, and more.

This Volumetric Filling Line can be outfitted with 6 to 12 filling nozzles in a linear format, or 8 to 40 nozzles in a rotary format. Filling accuracy: +/- 0.02%.

### ***Filling Station***

- Compact Stainless Steel Machine Frame
- Adjustable Frame Height w/ Lexan Safety Products
- PLC Electronic management of the liquid or product flow by means of pressure sensor at the infeed
- 2-way liquid delivery pneumatic valves
- Electronic height adjustment

## Details

- Filling Volume: Up to 5 Liters in a single dose
- Filling Nozzles: 6-12 (Linear) or 8-40 (Rotary)
- Max Output: up to 36,000 bottles/hr
- Stainless Steel AISI 304 Frame
- Stainless Steel AISI 316 Nozzles, Pistons, and Hoppers
- Product Sectors: Beverage, Spirits, Distillates, Pharmaceuticals, Cosmetics, Detergents, Chemicals
